*Comprehensive Yet Simple Water Data Management*

## WATER QUALITY DATA MANAGEMENT

SCHEDULE • COLLECT • REPORT • STORE • ANALYZE

- **Improve shared knowledge:** Handle sampling compliance on an easy-to-use calendar to via a central database providing robust data management
- **Reduce Human Error:** Collect your daily readings out in the field/plant on a smartphone/tablet eliminating the handwritten paper clipboard and manual entry.
- **Save valuable time:** Through automated report generation, required State-specific reports, and process control are completed in minutes instead of hours or days
- **Eliminate arduous research time:** Immediate access to all sample, meter, chemical, and precipitation data. Arduous research time in your filing cabinets.

### SEMS Technologies

Provides a custom designed calendaring system, mobile benchsheet, and automated electronic state reporting.

## Features

### AUTOMATED MONITORING SCHEDULE

State water quality monitoring schedule is displayed electronically with the necessary samples needed to be taken on SEMS' custom designed calendar system.

### MOBILE BENCHSHEET

Quick, effective collection of daily readings in the field/plant eliminating the need to manually enter handwritten results into excel multiple times reducing human error.

### STATE/INTERNAL REPORTING

Automated State and/or Internal reporting by utilizing the compiled data from your SEMS database to required generate your monthly (MOR), quarterly, and annual (CCR) reports.

### LAB CONNECT

Lab results from your contract or internal lab EDD/EDT files are directly imported into SEMS database eliminating manual entry and human error.

### SCADA CONNECT

Daily readings of meters and/or probes are automatically uploaded to SEMS from your SCADA or Historian.

### DATA MANAGEMENT

Centralized storage of all samples, meter readings, chemicals, and precipitation in a single location. Ability to query and export filtered data on location, parameter, and date range into excel. Eliminate arduous research time with immediate access to all your data removing the need of all the filing cabinets.

### SEMS ANALYTICS™

Powerful custom reporting engine, combined with excel pivot tables provides robust reporting capabilities. Access to data from the SEMS database allowing you to create custom reports that can be refreshed at anytime.
