ASSET MANAGEMENT

Comprehensive Yet Simple Utility Management Software

KEY BENEFITS

- **Accessibility:** Centralize your assemblies' and customers' information in a database that can be accessed from any computer.
- **Automates your letter generation:** Utilize mail merge to print all customer and assembly information with just a click of button.
- **User-friendly:** Learn our comprehensive—yet simple—point-and-click interface without extensive training.
- **Simple report generation:** Complete state reports in minutes rather than hours.

SEMS Technologies gives you a full Backflow Management program making an easy way to handle all your customers, backflow assemblies, and certified testers.
